TS-MS-042	Merchant signup	Verify Terms & Conditions must be accepted before merchant signup completion.	validation	High
TS-MS-043	Merchant signup	Verify merchant signup is successful with valid data in all steps and success message is shown.	Functional	Medium
TS-MS-044	Merchant signup	Verify merchant signup is failed with invalid data or no data in all steps and proper error message is shown.	negative	Medium
TS-MS-045	Merchant signup	Verify newly registered and approved merchant can log in with email and password	Integration	High
TS-ML-046	Merchant Login	Verify on clicking login button "login page" should be displayed, with admin,merchant,shopper component	Functional	Critical
TS-ML-047	Merchant Login	verify user can select "Merchant " and Merchant page should be displayed with "Registered Email"and "Password" text filed	Validation	Critical
TS-ML-048	Merchant Login	verify when user enter invalid/unregister emailIDs it should not accept	Negative	High
TS-MS-049	Merchant signup	Verify Merchant login fails with incorrect password	Negative	High
TS-MS-050	Merchant signup	Verify successful Merchant login redirects to correct admin home/dashboard page	System	Critical
TS-MAP-051	Merchant Add Product	Verify approved merchant sees "Add Product" option after login.	Functional	High
TS-MAP-052	Merchant Add Product	Verify clicking "Add Product" navigates to Add Product page.	Functional	Critical
TS-MAP-053	Merchant Add Product	Verify Add Product page displays all mandatory product fields as per requirement	Functional	High
TS-MAP-054	Merchant Add Product	Verify Product Name accepts valid characters and length within specified range	Validation	High
TS-MAP-055	Merchant Add Product	Verify Brand accepts valid characters and length within specified range.	Validation	High
TS-MAP-056	Merchant Add Product	Verify Brand rejects Invalid characters and length within Unspecified range.	Validation	High
TS-MAP-057	Merchant Add Product	Verify Product Title accepts valid characters and length within specified range	Validation	High
TS-MAP-058	Merchant Add Product	Verify Product Title rejects Invalid characters and length within Unspecified range	Validation	High
TS-MAP-059	Merchant Add Product	Verify Category and Category Type dropdowns show valid values and require selection.	Validation	high
TS-MAP-060	Merchant Add Product	Verify Price field accepts only numeric values within allowed range	Validation	high
TS-MAP-061	Merchant Add Product	Verify Price shows proper error message for invalid range	Validation	high
TS-MAP-062	Merchant Add Product	Verify Quantity field accepts only positive numeric values.	Validation	high
TS-MAP-063	Merchant Add Product	Verify Quantity field show proper error message for invalid range.	Validation	high
TS-MAP-064	Merchant Add Product	Verify Offer/Discount field accepts only valid percentage values where applicable.	Validation	high
TS-MAP-065	Merchant Add Product	Verify Offer/Discount field show error message for invalid percentage	Validation	high
TS-MAP-066	Merchant Add Product	Verify Thumbnail Image Link and Product Image Link fields accept only valid URL formats	Validation	high
TS-MAP-067	Merchant Add Product	Verify Thumbnail Image Link show proper error message for Invalid Formats.	Validation	high
TS-MAP-068	Merchant Add Product	Verify Description Field show proper error message for invalid range.	Validation	high

TS-MAP-069	Merchant Add Product	Verify Search tag show proper error message for invalid range.	Validation	high
TS-MAP-070	Merchant Add Product	Verify product cannot be saved when any mandatory field is missing or invalid.	Negative	high
TS-MAP-071	Merchant Add Product	verify successful product creation shows appropriate success message.	Functional	medium
TS-MAP-072	Merchant Add Product	Verify merchant can edit an existing product and save updated details	Functional	high
TS-MAP-073	Merchant Add Product	verify newly added product is visible to shoppers in listings/search once active	Integration	high
TS-MAP-074	Merchant Add Product	Verify newly added product appears in merchant product list.	Integration	High
TS-MAP-075	Merchant Add Product	Verify merchant can delete a product and it is no longer shown in shopper view	System	Critical
TS-SS-076	Shopper signup	Verify Shopper option is selectable from Create Shopper/Merchant and opens Shopper Sign Up page.	Functional	Critical
TS-SS-077	Shopper signup	Verify Shopper Sign Up page displays all mandatory fields as per requirement.	Functional	High
TS-SS-078	Shopper signup	Verify Shopper First Name accepts 3–20 alphabetic characters and is mandatory.	Validation	High
TS-SS-079	Shopper signup	Verify Shopper Last Name accepts 3–20 alphabetic characters and is mandatory	Validation	High
TS-SS-080	Shopper signup	Verify Shopper Gender radio buttons allows only single selection and are mandatory	Validation	High
TS-SS-081	Shopper signup	Verify Shopper Phone Number accepts exactly 10 digits starting with 6/7/8/9.	Validation	High
TS-SS-082	Shopper signup	Verify Shopper Email accepts valid email format, allowed domains and no spaces	Validation	High
TS-SS-083	Shopper signup	Verify Shopper Password accepts valid password rules.	Validation	High
TS-SS-084	Shopper signup	Verify Password and Confirm Password must match to proceed.	Validation	High
TS-SS-085	Shopper signup	Verify Terms & Conditions must be accepted before shopper registration.	Validation	High
TS-SS-086	Shopper signup	Verify proper error messages are displayed for each missing/invalid field on Shopper Sign Up	Validation	High
TS-SS-087	Shopper signup	Verify shopper registration succeeds with valid input and confirmation message is displayed.	Functional	Medium
TS-SS-088	Shopper signup	Verify newly registered shopper can log in using registered email and password	Integration	High
TS-SL-089	Shopper Login	Verify Shopper login is successfull with valid data	Functional	High
TS-SL-090	Shopper Login	Verify shopper login fails with invalid/unregistered email	Negative	High
TS-SL-091	Shopper Login	Verify shopper login fails with incorrect password.	Negative	High
TS-SL-092	Shopper Login	Verify login form does not allow login when email and/or password are blank	Functional	High
TS-SL-093	Shopper Login	Verify successful shopper login redirects to shopper landing/product listing page.	System	Critical
TS-SL-094	Shopper Login	Verify shopper session is maintained until logout or timeout as per requirement	System	High
TS-SP-086	Search Products	Verify Search bar is visible to logged-in shoppers on landing page/Home page	UI	High
TS-SP-087	Search Products	Verify search results show basic product details (name, price, thumbnail).	UI	Medium
TS-SP-088	Search Products	Verify searching by exact product name Displays matching product	Functional	Medium
TS-SP-089	Search Products	Verify searching by partial product name returns relevant product list	Functional	Medium
TS-SP-090	Search Products	Verify shopper can enter text in search box	Functional	Critical
TS-SP-091	Search Products	Verify appropriate message is shown when no product matches search keyword.	Negative	Medium
TS-SP-092	Search Products	Verify special characters in search input do not break page and show safe message or no results.	Negative	High
TS-SP-093	Search Products	Verify search results refresh correctly when a new search item is entered.	Functional	Medium
TS-SP-094	Search Products	Verify clicking a product from search results opens product description page.	Integration	High
TS-SP-095	Search Products	Verify search works correctly after shopper navigates back from product detail page.	System	High
TS-SP-096	Search Products	Verify search handles leading/trailing spaces in the search text gracefully	Validation	Medium
TS-AC-097	ADD to CART	Verify "Add to Cart" button is available on product description page.	UI	High
TS-AC-098	ADD to CART	Verify cart page lists all added products with name, price, quantity and subtotal.	UI	high
TS-AC-099	ADD to CART	Verify shopper can add a product to cart from product description page	Functional	High
TS-AC-100	ADD to CART	Verify cart icon count increases when a product is added	Functional	Medium
TS-AC-101	ADD to CART	Verify same product added again updates quantity or shows message as per requirement.	Functional	Medium
TS-AC-102	ADD to CART	Verify shopper can open cart page by clicking cart icon.	Functional	High
TS-AC-103	ADD to CART	Verify shopper can change quantity of a product in cart	Functional	High
TS-AC-104	ADD to CART	Verify shopper can remove a product from cart and cart count is updated accordingly.	Functional	Medium
TS-AC-105	ADD to CART	Verify cart is cleared or handled as per requirement after successful order placement.	System	Medium
TS-AC-106	ADD to CART	Verify cart retains added products while shopper navigates across pages	System	High
TS-AC-107	ADD to CART	Verify total price in cart is correctly calculated based on product prices and quantities.	Validation	Critical
TS-AA-108	Add Address	Verify shopper can navigate to Add Address page	Functional	Critical
TS-AA-109	Add Address	Verify Add Address form displays all mandatory fields (Name, Address lines, Landmark, Country, State, City, Pin Code, Phone, Address Type)	Functional	High
TS-AA-110	Add Address	Verify Address Type (Home/Office etc.) is selectable and mandatory.	Validation	High
TS-AA-111	Add Address	Verify Name field accepts valid alphabetic name within allowed length.	Validation	High
TS-AA-112	Add Address	Verify Address line fields accept alphanumeric characters and basic punctuation.	Validation	High
TS-AA-113	Add Address	Verify Country, State and City are mandatory dropdowns and allow valid selection	Validation	High
TS-AA-114	Add Address	Verify Pin Code field accepts only numeric values of valid length.	Validation	High
TS-AA-115	Add Address	Verify Phone Number field accepts exactly 10 digits starting with 6/7/8/9.	Validation	High
TS-AA-116	Add Address	Verify address cannot be saved if any mandatory field is blank or invalid	Negative	High
TS-AA-117	Add Address	Verify successful address save shows confirmation message.	Functional	Medium
TS-AA-118	Add Address	Verify newly added address appears in the list of addresses for selection during checkout	Integration	High
TS-PO-119	Place-Order	Verify shopper can proceed to checkout from cart page	Functional	critical
TS-PO-120	Place-Order	Verify shopper is Able to select a delivery address before placing the order	Functional	High
TS-PO-121	Place-Order	Verify shopper can select one address from list of saved addresses	Functional	High
TS-PO-122	Place-Order	Verify payment method selection shows Cash on Delivery as an option.	Functional	High
TS-PO-123	Place-Order	Verify shopper can select Cash on Delivery and continue to place order.	Functional	High
TS-PO-124	Place-Order	Verify checkout page displays summary of products, quantities and total amount.	UI	High
TS-PO-125	Place-Order	Verify system does not allow order placement if no address is selected.	Negative	High
TS-PO-126	Place-Order	Verify order placement fails if product stock becomes unavailable before confirming	Negative	critical
TS-PO-127	Place-Order	Verify system prevents COD order when cart is empty or cart items are removed	Negative	High
TS-PO-128	Place-Order	Verify system blocks order placement when user session expires during checkout	Negative	High
TS-PO-129	Place-Order	Verify order appears in shopper's order history with status appropriate for COD	Integration	Medium
TS-PO-130	Place-Order	Verify order confirmation page is displayed after placing COD order with correct order ID and details.	System	critical
